Fitness Class Descriptions

- **Aqua** – Offers a great range of benefits, without many of the drawbacks of intense exercise classes. Helps you lose weight, get stronger and improve your fitness too!
- **Aqua Aero Mix** – A fun, low impact workout using the water as resistance, this class is a hybrid of aqua aerobics and aqua Zumba. Great for anyone with joint pain.
- **Balance & Flex** – Standing and seated mobility exercises emphasizing continuous rhythmic ranges of movement.
- **Band Blast** – Focus is on exercises that build. Strength and muscle definition using resistance bands and more.
- **Barre** – Helps build and strengthen your muscles, improve your core strength and posture and give your body a lean and toned look in less time.
- **Chair Yoga** – A gentle yoga practice using the support of a chair for seated and standing poses. This class improves flexibility, balance and mobility while reducing stress. Perfect for all levels, especially those looking for a safe and accessible yoga experience.
- **Core & More** – Engaging abdominal and back muscles in a coordinated way to improve functional strength for daily activities while tightening and toning the core.
- **Cycle** – A heart pumping, calorie burning cardio session on a stationary bike.
- **Gentle Yoga** – Enjoy hatha yoga at a slower, more restorative pace. Great for those just beginning a routine.
- **LaBlast Zumba** – While Zumba incorporates Latin and international music, LABLAST is based on the ballroom dances you see on Dancing with the Stars! (No partner needed) and all genres of music. You will have a great time with the variety of dance styles, fitness components and light weights. These classes are suitable for all levels.
- **Pilates** – Focuses on the core and promotes flexibility to develop leaner-looking muscles.
- **Slow Flow Yoga** – The pace is meditative, emphasizing peace and calm in body and mind. We hold poses longer, taking several rounds of breath in each pose instead of moving to each breath.
- **Strength & More** – A total body workout using weights, resistance bands and body weight to define and sculpt arms, legs, abs, back, and glutes.
- **Vinyasa** – Dynamic flowing practice through a balanced series of postures to strengthen, build flexibility, promote physical stamina and a sense of deep inner calm. All levels.
- **Yoga** – An intermediate form of yoga focused on coordination, breathing, and continual movement. All skill levels welcome.
